

CYPRES „Trade-In“ for customers in USA, Canada, South America and other Western Hemisphere countries

Dear CYPRES - customers,

Soon the first CYPRES units will reach the end of their life-time of 12 years +3 months.

As we want to avoid that old CYPRES units which may cause malfunctions stay in service it's in our and the skydiver's interest to take these units off the market.

To reach this aim, we have decided to offer our customers, whose CYPRES are affected, a "Trade-In" in the amount of \$ 80 on the condition that a new unit is purchased.

We will be handling the "Trade-In" exclusively through our dealers to keep the procedure as easy as possible.

The following facts should be taken into consideration.

- 1.This offer is valid for all units up to one year after expiration of their life time.
- 2.Only one old unit can be traded in per purchase of one new unit.
- 3.The bonus of \$ 80 will only be given upon return of a complete CYPRES with a non-activated cutter.
- 4.If you return a unit without cutter or with an activated cutter, the credit amounts to \$ 50.
- 5.Cutters are also affected by the life time regulation. Due to the production process, the original cutter(s) can be slightly older than the CYPRES itself. These cutters are airworthy until the unit reaches the age of 12 years +3 months.
- 6.The life-time regulation of 12 years +3 months is also valid for cutters. The important fact is the date on the plug of the cutter. If you want to keep an already used one, please send them in (via your dealer) for a free of charge check up. This inspection will assure that the cutters are not damaged (cable,shielding,etc.)

If you require further information, or have any questions, do not hesitate to contact your dealer.

Blue Skies,

Your Airtec-Team
