CYPRES

RENT A CYPRES

11/99

This is a SERVICE we offer EXCLUSIVELY through our dealers since the beginning of this year.

Most of you have experienced this situation: The CYPRES is due for its maintenance – your customer doesn't want to be without it - there are:

- Student training courses'
- Tandem passengers'
- Events coming up
- Instructors wanting to do their jobs
- Teams who need to train
- blue skies ...

... this is where Rent-a-CYPRES can help!

For a small charge per day, it is now possible to rent-a-CYPRES. The rental period starts the day after it is shipped from Airtec or SSK - and ends the day before the unit is received back. Airtec will cover all service and replacement part requirements such as batteries (but not including cutters or damage caused to the CYPRES by improper use or theft).

For all US and Canada dealers, we will arrange for the rental CYPRES to be available through SSK Industries so as to minimize shipping charges.

To order a rent-a-CYPRES, please make sure that you let Airtec or SSK know when the unit is needed, for approximately how long it will be needed (so that the proper shipping method can be used).

The rental charge will be US\$ 2.00 per day, plus shipping charges both ways.

It is the dealer's responsibility to properly package and insure return shipment to Airtec or SSK.

Please note that we only have a certain quantity of rental CYPRES units available and, therefore, this offer is subject to availability.
